23.	Summary of the Event	The seminar on "Cloud Security and Emerging Technologies" was organized with the aim of providing students with insights into the rapidly evolving landscape of cloud computing and the security challenges associated with it. The event aimed to bridge the gap between theoretical knowledge and practical applications in the field of cloud security. The seminar commenced with an overview of cloud computing and its basic concepts, and its significance in the emerging AI context. The speaker elucidated on the various service models (IaaS, PaaS, SaaS) and deployment models (public, private, hybrid) in cloud computing. Key topics covered were cloud deployment models, characteristics, cloud service models, migration from legacy to cloud native applications. Topics such as artificial intelligence (AI) for threat detection, block chain for ensuring data integrity, and zero-trust security models were explored. Students had the opportunity to engage with the speaker, clarify their doubts, and share their perspectives on cloud security and emerging technologies. The seminar proved to be a valuable learning experience for students interested in pursuing careers in cyber security and cloud computing.
