15.	Summary of the Event (Minimum 100 words)	<p><i>Developing and maintaining good personal hygiene is key to having a healthy body and mind.</i> Good personal hygiene involves keeping all parts of the external body clean and healthy. It is important for maintaining both physical and mental health. In people with poor personal hygiene, the body provides an ideal environment for germs to grow, leaving it vulnerable to infection. For most people, personal hygiene is simply a matter of walking into their bathroom and engaging in "washing up" and getting clean. The basic act of staying clean is something that people often take for granted in terms of feeling human and being healthy and requires great resourcefulness for those experiencing homelessness. For people who live on the streets, maintaining proper hygiene and a sense of dignity is a time-consuming and potentially dangerous endeavor. Many people experiencing homelessness suffer from preventable health conditions which could be avoided with regular access to proper hygiene and other basic needs. This issue is not just confined to the streets. Individuals experiencing poverty often forego basic needs so as to make ends meet. So, hygiene becomes increasingly important to keep germs at bay and to stay protected. A rally on "Health &amp; Hygiene Awareness" was organized by the ISR Cell of MBA BU department of DSI on 18.05.2023 between 1:15 and 3:15 pm to sensitize the public and also create awareness about the importance of health &amp; hygiene for everyone. This awareness drive saw humongous participation from the MBA BU students who came onto the streets of Kumaraswamy layout with Placards and banners on the significance of human health and hygiene. The students during the course of the rally also tried motivating people to adopt practices towards maintaining clean and hygienic surroundings.</p>
