

Workshop on “Call for Code Day”

MCA department, DSCASC was organized hands-on workshop On 7th of April 2021. This workshop was led by Mr. Yuktesh Chintamadaka, IBM.

This workshop was all about the upcoming competition called “Call for Code” initiated by IBM. This competition has been going on for four years and every year the theme set for the competition is related to sustainability issues on Earth. This year the theme is on Climate Change. Climate change has been one of the dangerous consequences now a days, due to this we as humans should start taking initiative to make our Earth a better place. Keeping this unique idea, they are calling out for the participants who can exhibit their idea through technology which can help in betterment of Earth’s climate. Followed by this introduction session, Students had hands-on activity related to IBM cloud platform and how to develop applications using Watson IoT platform. Students were shown a gist of how we could create applications using Node-RED, related to climate change without using any much coding.
