Session on Big Data Analytics

Mr. Harsha & Team, NIIT, Bangalore

Mr. Harsha addressed the VI MCA students, and given a session on Key Skills Used in Big data. He is working as a Software engineer in NIIT. The workshop conducted successfully on 31st August 2018. It was a very much interactive session for the MCA Students. Hadoop has been explained along with architechture, but it'd be difficult to compile a list of big data technologies without mentioning it.

The important topics covered in the workshop is

- Big data programming languages
- NoSQL databases
- Data lakes
- Hadoop Architechture
- Advanced analytics
- Stream analytics
- Edge computing
