Best Practice 1
2018-19

"Scholarship aids and Financial Rewards to Students"

Financial rewards are a way of motivating the students to involve and excel themselves in the field of academics. Financial rewards are given to students who make good grades and maintain 100% attendance throughout the semester.

The objective of the practice is to help students better understand the role of education and motivate them to strive hard and do better.

The college also provides Scholarship, a form of financial aid awarded to meritorious students who have secured more than 85% in their Pre-University Exams during the time of admissions so that they can meet the cost and financial expenses of studying in the institution.

Implementation of this practice has encouraged students to work hard which has led to higher student achievement, better results, and performance and is believed that in the long-run, a more productive workforce can be achieved.
