23.	Summary of the Event	The Department of Computer Applications (BCA) organized a school outreach program to educate students about "Best out of Waste" products and promote environmental awareness. The event featured an exhibition of innovative items crafted from discarded materials, showcasing the creative potential of upcycling. Through interactive presentations, the college students highlighted the importance of recycling and waste reduction, inspiring schoolchildren to adopt sustainable practices. This initiative effectively educated and engaged young minds, encouraging them to think critically about waste management and contribute to a cleaner, greener environment.

Feedback for School Outreach Program.

The activity or session conducted by "Eco Club" where we volunteers were required to display the artworks which were created by the participants of the competition in which they had to create best out of waste. This was a very joyful, and memorable experience for us where we interacted with childrens of "Dayanand Sagar International School". They were curious, excited and very interested when we displayed the artworks. Events like this inspire and motivate us to participate or volunteer for more events like this. The happiness and excitement showcased by the childrens really made this session a memorable experience. We are looking forward for such events in the upcoming days.

Eco club

The session was a very joyous moment for the volunteers where we were given a opportunity to interact with the children's studying in Dayanad Sagar International School. The curiosity, excitement and interactiveness of those children's made the session a very memorable experience for us. Each time we showcased some object which was made out of waste, the students were eager, surprised and got excited. And activities like this encourages and inspires us to perform or take part in the upcoming sessions held by the "Eco club"
