Seminars on Tiny GPT

The seminar on tiny GPT was very resource full and understanding. It had real world example with how it works and it consist of codes with syntax which was even more helpful to understand the new concept. The explanation with creative example made the seminar more interesting. Thus the session was very helpful for us as we all learned the new kon and got experiance of how to use it

The Explanaton about building own Gpt was very interesting, the speaker was very clear and firm, while explaining the topic. although we learnt about how and why certain libraries are used such as pandas, opencv and alot more about algorithms, anyway, the seminar was incredible and hoping to get more such good seminars in futures.
