

## Semester: 2<sup>ND</sup>

**Date: 11.8.2023**

**Course: I M.COM**

**Subject: Modern Indian banking**

**Faculty: Dr.Monica Ranka**

**Method of experiential Learning: Structured Quiz**

Quizzes are a great way to have fun, but they can also be used as a tool for self-improvement. They can help you learn more about yourself and how others view you. In a quiz, which is also known as a mind sport, participants compete to answer questions either individually or in teams correctly. Beyond the obvious academic advantages of exposing a child to new ideas and abilities at a young age, quizzes fundamentally alter how education is provided. On 11<sup>th</sup> August , a quiz was conducted.

## IV

**Semester: 2<sup>ND</sup>**

**Date: 25.7.2023**

**Course: II M.COM**

**Subject: Forex Management**

**Faculty: Dr.Monica Ranka**

**Method of experiential Learning: Flipped Learning**

Flipped learning is an increasingly popular pedagogy in secondary and higher education. Students in the flipped classroom view digitized or online lectures as pre-class homework, then spend in-class time engaged in active learning experiences such as discussions, peer teaching, presentations, projects, problem solving, computations, and group activities. In other words, this strategy “flips” the typical presentation of content, where class time is used for lectures and example problems, and homework consists of problem sets or group project work

Keeping the view in mind on 25<sup>th</sup> July 2023, the activity was conducted.

FACULTY; Dr.Monica ranka

Method : Flipped Class room learning

Flipped learning is an increasingly popular pedagogy in secondary and higher Education. Students in the flipped classroom view digitized or online lectures as pre-class homework, then spend in-class time engaged in active learning Experiences such as discussions, peer teaching, presentations, projects, problem solving, computations, and group activities. In other words, this Strategy “flips” the typical presentation of content, where class time is used for lectures and example problems, and homework consists of problem sets or group project work.
